LEGAL DISCLAIMER

It is required that you read this legal disclaimer section carefully. Get advice from legal, financial, taxation, or other competent law practitioners if you have any doubts. All of the information provided here is not intended to be complete, and it should never be construed as a part of different contractual arrangements.

Our firm conviction is that the information provided in this white paper is accurate and up to date and that all products, services, technical architecture, token distribution, and company timelines are accurate and up to date. Furthermore, all of these materials may have changed without notice, and they can never be considered a signatory agreement of advice.

No Advice:

This white paper does not obligate anybody to sign a contract or make a legally enforceable commitment to contribute. This white paper also does not constitute any form or part of any opinion that can be construed as advice or that can be used to sell or solicit any offer by Trillions to purchase our token, nor shall it be construed as a part of any effect that can be used in the formation of a contract or an investment decision.

Compliance with tax obligations:

Users of the Website are entirely responsible for determining what, if any, taxes, if any, apply to their transactions. The Website's owners or authors are not responsible for determining which taxes apply to transactions.

Limitation of liability

The rule shall not be held liable for any loss or harm resulting from the use of this Website's material, including written material, links to third-party sites, data, quotations, charts, and buy/sell signals. Please be fully informed about the dangers and expenses of trading assets on the financial markets (digital or otherwise). ICOs, in particular, is one of the riskiest investing options. There's a chance you'll lose your entire investment.

Investment risks

Trading cryptocurrencies have a high-risk level and is not suited for all investors. You should carefully evaluate your investing goals, level of expertise, and risk appetite before opting to trade cryptocurrencies, tokens, or any other digital asset.

ABSTRACT

Ezillion (trading symbol “EZI”) created by Ezillion.io is not only an emerging cryptocurrency platform that is built on the Binance Smart Chain (BSC) but also has features of transparency, physical rewards, token rewards and Initial coin distribution which we believe is crucial for long-term feasibility and decentralization.

This white paper is a reader-friendly description of a next-generation decentralized cryptocurrency launchpad based on the Binance Smart Chain (BSC). In the crypto market, several problems need to be addressed head-on. **Ezillion** developers sensed a real market opportunity to fill the gaps present today within the cryptocurrency world, NFTs marketplace adoption, and capitalizing on the BSCScan by the rewarding of **EZILLION TOKEN** investors with physical rewards such as **EZILLION TOKENS** to all new investors.

These key characteristics serve as the key elements of this business, ensuring that we remain focused and humble as we work to develop bigger and better technologies.

INTRODUCTION

The Cryptocurrency universe is a breeding ground for new decentralized and innovative systems that will bring solutions to some of the most important issues in the world. Ezillion is all in one ecosystem based on Binance smart chain, Ethereum, polygon network and NFTs, where buyers and sellers meet to transact based on long-term speculative and value views. The Ezillion protocol is based upon statistic Rewards as EZI tokens. The investors will earn passive income by holding the token for time.

Ezillion is an environmental & eco-friendly, modern technology-based cryptocurrency built on multilayered structural blockchains like Binance Smart Chain (BSC), Ethereum, and polygon. Ezillion is a peer-to-peer decentralized platform that enables instantaneous, near-zero cost payments to anyone in the world. Ezillion Launchpad is a protocol with privacy-boosted features. Every project that is launched on Ezillion must be KYCed, audited, and Doxxed as EZI strive to offer the best and secured projects to its investors. Transactions that occur on the blockchain are made in a peer-to-peer fashion with no need for intermediaries.

Ezillion is a protocol that has been built and designed to directly reward holders while simultaneously growing in value and liquidity on the Binance Smart Chain.

Ezillion launchpad is an IDO platform for launching new coins and tokens for rising liquidity on a decentralized exchange using coins. Ezillion is a protocol aiming to provide users with the capabilities to launch their token and create their initial token sale with reflections and profit sharing mechanism.

MISSION

Ezillion aims to address current pain points that impede the crypto custodial experience for the general public by combining the security, simplicity, and accessibility of cryptocurrencies into a cohesive platform. Our mission is to "Lift Ezillion to New Heights" by offering investors an innovative, user-friendly, one-stop-shop to find everything they need to buy, sell and hold and make a more educated decision to choose Ezillion or not. Our mission has always been to make it as simple as possible to buy and sell cryptocurrencies, while also being a leader in security, accessibility, reliability and custody.

Our Mission is to:

- Provide simple and effective solutions for all Holders to gain access to digital assets.
- Reduce the entry barrier into a more complex financial environment.
- Operate as a community-focused and community-driven digital asset that is completely decentralized.
- Our objective is to assist investors in flourishing and reaping the benefits of a decentralized blockchain environment.
- The main purpose of creating the Ezillion launchpad is to be used by people for trading, swapping and staking their crypto assets and earning passive income.
- Create greater wealth and a sense of security to our investors from our profit sharing and reflection reward mechanism. We believed our investors should be rewarded and benefited greatly.

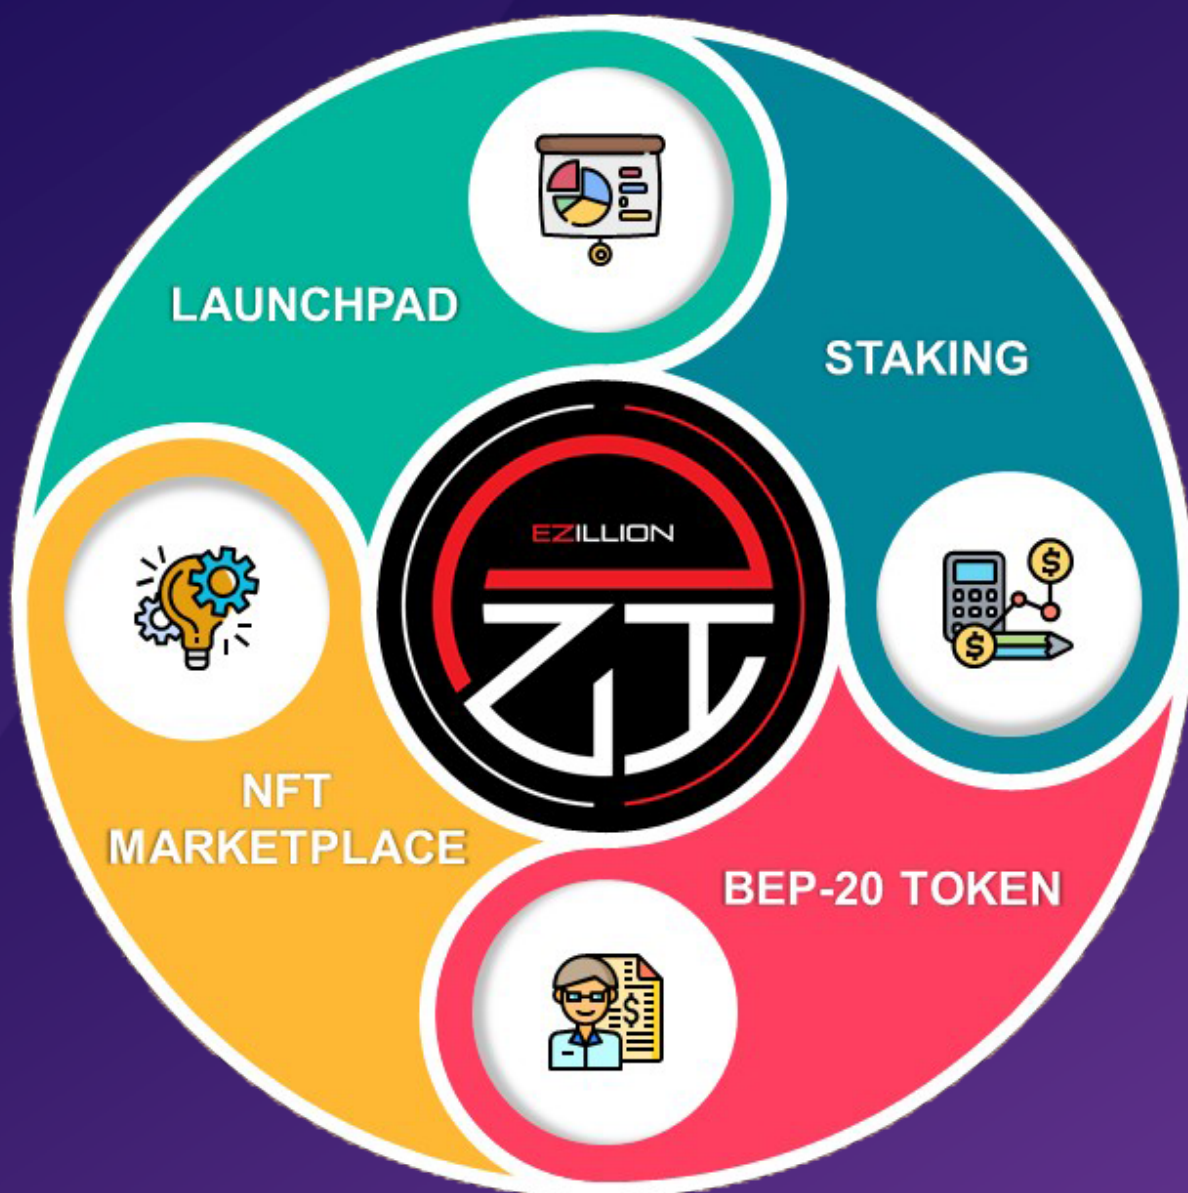

VISION

We strive to put "cryptocurrency in every portfolio." We envision a society in which wealth-building tactics that were previously solely available to the wealthy, are made open to everyone; restoring people's control over our financial institutions. Ezillion protocol will establish a break in the ecosystem to attract more people into digital assets, allowing them to generate a passive income through redistribution/reflection while keeping their privacy, security, authority, and autonomy by holding the Ezillion tokens for the long- term. With the Ezillion digital asset, we want to create an ecosystem based on reasonable monetary regulations and a robust & solid decentralized foundation. Our vision is to bring out the best ideas and utilities into the world of cryptocurrency and blockchain.

ECOSYSTEM

STAKING

The Ezillion is primarily integrated on the Binance Smart Chain, which is an eco- friendly and uses a proof-of-stake system. By utilizing excellent security mechanisms and offering a Secure Asset Fund for Users, Binance holding guarantees that users' assets are protected (SAFU). Our Staking technique is likely one of the safest and most environmentally friendly ways (for cryptocurrencies) to make passive income.

The platform uses a secure wallet and a double-checking mechanism to stake all hold tokens. Crypto staking is quickly becoming a trend of earning passive income by merely keeping or locking assets in a wallet as more people, especially institutional investors, recognize the crypto market's lucrativeness. Due to the technical constraints of holding cryptos, Ezillion's staking platform came inconveniently to allow investors, even people without a technical understanding of cryptos, to stake Ezillion tokens, and use it.

Staking services that allow investors to receive staking incentives have sprung up in response to the rapid rise of crypto holding. If you're looking for a way to earn passive income, Ezillion is a great choice.

STAKING

Staking is advantageous in the world of crypto-currencies since it generates incentives and passive income by maintaining the currency on any market. In a decentralized system, the simplest method is to own a currency and stake the pool. However, Holding consumes much more energy and poses a greater risk than cryptomining. Ezillion can help you.

BENEFITS OF STAKING

SOVEREIGN SYSTEM

A decentralised currency dealing worldwide with a well-developed infrastructure

SECURITY

It features built-in security, which is critical for ensuring a ledger's integrity.

FAST TRANSACTION APP

It also has a higher transaction speed than most others, making it efficient and unique.

BENEFITS OF STAKING

LOW TRANSACTION FEES

Ezillion is based on BSC, a cryptocurrency with exceptionally cheap transaction costs.

COMPLETE UNIQUENESS

Ezillion is a decentralized token with a community focus.

DECENTRALIZATION

Data is duplicated over a decentralized network of computers, removing numerous current concerns associated with storing data centrally. In the instance of the Ezillion app, there is no single point of failure.

PASSIVE INCOME

Ezillion is a decentralized protocol with a feature of double rewards staking system that is profit-sharing utilities and token reflections.

NFT MARKETPLACE

Ezillion NFT is the vital part of our ecosystem dealing with NFT'S. Ezillion Non-fungible tokens (NFTs) are unique, non-interchangeable assets, minted on-chain. These tokens can be linked to anything from digital EZI. The core attributes of EZI NFTs give them unique value and categorically separate them from other types of assets. These properties include being verifiably unique and indivisible. The transparent nature of the underlying code means that the scarcity and ownership of any given token are evident without the need for a trusted intermediary. We view the emergence of NFTs as a continuation of a paradigm shift from centralized to decentralized systems. This framework is now unlocking fresh business models for the creators of digital and physical collectibles. Ezillion is a widely known NFT project. The underlying token for each EZI encodes a unique genome that defines its appearance, traits, and hereditary lineage. Ezillion NFTs cannot be replicated and cannot be transferred without the user's permission. Ezillion NFT marketplace has capabilities to create, mint, sell, buy with multichain option whereby users can select their preferred chain such as ethereum, polygon, or Binance Smart Chain.

Transparency, authentication, ownership, provenance, copyright, and forgery have all been issues in the crypto industry for a long time. Moreover, the industry has historically been restricted to the elite who can manage to invest millions of dollars on a single art. On the other hand, is unquestionably intended to be enjoyed by everyone, and it can transcend all social and economic barriers.

Fortunately, with our designed Ezillion ecosystem, the obstacles outlined above are nearly resolved. And, as of today, the collections and art industry has created and effectively deployed amazing and sophisticated art/game to enjoy. we are ready for transformation in the way NFTs is purchased, marketed, sponsored, loved, and even made. Ezillion is going to launch NFT marketplace for creators, sellers and buyers where collectors and creators can come, bid and buy their favorite NFTs.

EZILLION TOKEN

Ezillion token serves different functions. It acts as the platform's backbone and as the medium of exchange for all platform transactions. EZI, BEP-20, is a decentralized cryptocurrency based on the Binance Smart Chain. EZI is the currency needed to transact on the various distribution modules associated with the Ezillion decentralized application. Token owners have the option of staking their tokens in the Ezillion wallet to receive special rights and rewards within the network.

EZI is the digital currency used in the Ezillion application. The token is a BEP-20 powered token built on the Binance Smart Chain to make sure every transaction is traceable on the blockchain, anonymous for the user and at the same time provide overall high security for the end-users.

Ezillion launchpad aims to be a free marketplace where each user will be allowed to make money in their area of interest and at the same time provide a platform for all the people who need some form of help in everyday life, whatever it may be.

Ezillion token is a multi-utility token on the Ezillion launchpad and will be applied as follows:

- Staking and Farming to get rewards in Pools.
- NFT marketplace to create, mint, buy and sell NFTs.

WHY SHOULD YOU INVEST

TRUST

It is hard to overestimate the value of trust in the cryptocurrency market. That entails complete transparency in terms of community support and development and terms of any security-related initiatives. Examples include high-quality audits of the Binance and ethereum code to decrease the possibility of harmful activity significantly. Project owner will KYC'ed and submit for Smart Contract Audit.

LONGEVITY AND REWARD

Ezillion is committed to the network for the long run. The decentralized community is promoting the long-term development of the ecosystem, which will result in real-world applications, more incentives, and increased popularity in the long run.

LOW GAS FEES

Since the pre-sale, people who have held Ezillion token will get whitelisted for the utility token launch.

EASE OF USE

The fact that Ezillion token is simple to use contributes to its worth. You will need a smart device and an internet connection to become an investor right away.

TRANSPARENCY

With the Ezillion protocol, each time exchange of tokens is recorded on the Binance blockchain, an audit trail is present to trace where the coins came from. This can help to improve security and prevent fraud in exchange-related businesses, but it can also help verify the authenticity of the traded assets.

UNIQUE KEY FEATURES

Reflections rewards

Profit sharing

Staking

Double Rewards

Multichain NFT

- Benefit of staking - Profit sharing from utilities and token reflections. (Double rewards)
- Benefit of holding - Token reflection rewards. (Single reward)
- Multichain NFT Marketplace - Ability to create, mint, buy and sell NFTs in Ethereum, Polygon, Binance Smart Chain and more.
